

# The Eppendorf PhysioCare Concept®

The mission of Eppendorf has always been to improve the living conditions of their customers. Nowadays where people spend a lot of their time at work the ergonomics of their tools and the whole work environment is becoming more important for their well-being. Thus the development of each Eppendorf pipette is based on three spheres that support the health of their customers.

Each of these spheres offers stringent ergonomic criteria which are directly involved in the users work process:

- Sphere 1 – The User
- Sphere 2 – The Lab
- Sphere 3 – The Laboratory Workflow

**Sphere 1 – The User:**  
The PhysioCare Concept guarantees an ergonomic design and an optimized product performance according to the needs of the individual.

**Sphere 3 – The Laboratory Workflow:**  
The PhysioCare Concept ensures general support to enhance processes around the lab and improve the results of the whole organization.

**Sphere 2 – The Lab:**  
The PhysioCare Concept allows the uncomplicated integration of instruments in the lab as well as adhering to its specific requirements.
